Notes and Definitions

Abbreviations:

WIA - Wounded in Action
IIA - Injured in Action
M-B Injury - Non-battle Injury
FUC - Fevers of Undetermined Origin

Annual Rates per Thousand:

Rates in the form of "annual rates per thousand men" are conventionally used in medical statistics and reporting. They serve the purpose of basing observations on a common time-period. Most annual rates in this report are based on observation of a month-long period; such rates can be converted to rough percentages for the month by dividing them by 120.

Crude Death Rates:

This term applies to deaths from all causes among the entire army in the theater, as distinct from death rates specific for cause, age, risk, and so on.

HEALTH OF U. S. ARMY TROOPS IN SWPA

APRIL - MAY 1945

1. NON-EFFECTIVENESS

The upward trend in the non-effective rate which started in February continued during April. The mean non-effective rate for April was 55.2 per 1000 strength. This experience in the main reflects the increasing accumulation of battle casualties treated on an "excused from duty" status following the initiation of the Luzon Campaign. From incomplete reports, it is estimated that the rate for May will show a slight decrease over the level reached during April.

2. ADMISSIONS TO SICK REPORT

The rate of admissions to sick report for April increased by about 5% over that reported for March. This was principally caused by an increase in the admission rates for malaria, hepatitis and venereal diseases. The estimated admission rate for May indicates that the rate has declined to that reported for March.

3. DEATHS

The death rate from all causes for March and April decreased approximately 20% from the peak of 48 per 1000 strength per annum reported for February. This decrease was due mostly to the decline in the number killed in action and died of wounds. The death rate from non-battle causes for March and April also decreased from that reported in February. Accidental deaths associated with air transportation decreased markedly during April, while accidental deaths due to firearms increased.

4. EVACUATIONS

The highest evacuation rate experienced in this theater occurred in April. While the rate decreased by 27% in May, the rate of evacuation during the latter month was about twice the average rate during 1943-1944. The percent of cases evacuated for dermatitis during April and May returned to the level for the year of 1944. The evacuation rate for battle casualties increased markedly during April and while it decreased during May, the latter rate was the second highest for battle casualties experienced to date. There were 1898 patients evacuated to the United States in April by air and 1777 in May. There were 2464 patients awaiting evacuation to the United States on 1 June.

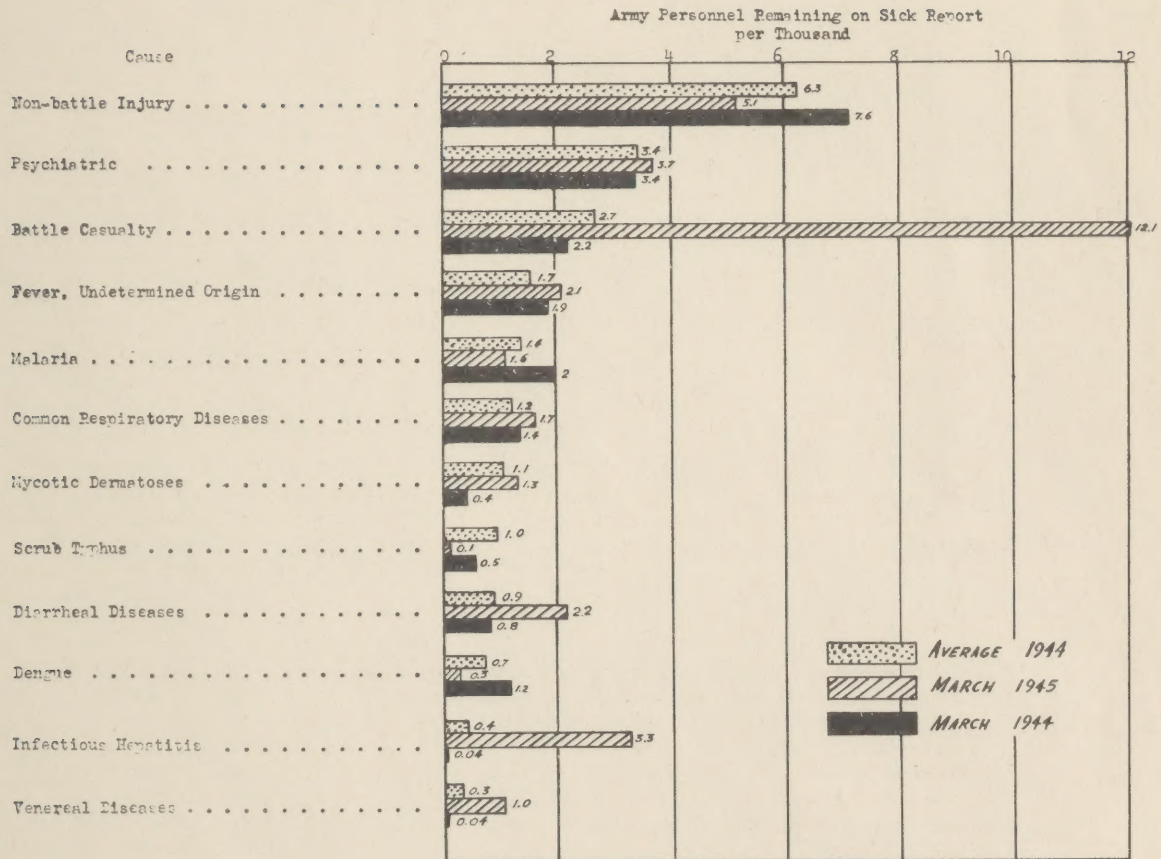

5. HOSPITAL BEDS

A total of 67275 beds, 56,500 beds in fixed hospitals and 10775 in non-fixed hospitals, were present in the theater as of 25 May. Of the 56500 fixed beds, 36450 were actually operating, while 12,550 beds were under movement orders. There were 34645 patients occupying beds in fixed hospitals as of 25 May.

DENTAL SERVICE ACCOMPLISHED BY THE ARMY DENTAL CORPS

IN THE SWPA FOR THE MONTH OF MARCH

Absolute numbers and rates per thousand per annum			792,421
Type of Service	Number	Rate per thousand per annum	Rate per thousand per month
Admissions	79,037	1196.9	99.7
Sittings	160,823	2435.4	203.1
*Permanent Restorations	93,739	1419.5	118.3
Extractions	20,377	308.6	25.7
Teeth Replaced	27,756	420.3	35.0
Dentures Constructed	3,524	53.4	4.4
Dentures Repaired (Including Rebase)	1,899	28.8	2.4
Bridges Constructed	367	5.6	0.5
Prophylaxis	13,251	200.7	16.7

*Includes fillings, crowns, root canals, inlay recemented and crown recemented.

The number of Dental Officers reporting the above Dental Service for the month of March was 801 with the ratio of total Dental Officers to the total strength being 1.1 per 1000 men, or one dentist for every 908.7 men.

The admission rate for Stomatitis, Vincent's, during March was 7.3 per 1000 per annum or 0.6 per 1000 for the month, a slight decrease from preceding month.

For every tooth extracted, 1.4 were replaced by dentures or bridges, indicating that 40% more teeth were replaced than extracted. The average number of teeth replaced by each partial denture constructed was 5.9. During the month 880 defective bridges were repaired or recemented. For each tooth extracted there were 4.6 permanent restorations, (fillings, etc) inserted. The average number of permanent restorations per reporting Dental Officer was 117.0. The average number of teeth extracted per reporting Dental Officer was 25.4. For the Amalgam restorations, 35.1% were Oxyphosphate and Amalgam. Of the Silicate restorations, 5.4 were Oxyphosphate and Silicate.

All the above ratings were computed on the basis of the Mean Strength of March 1945.

As of: 31 March 1945.

Bridges Constructed	320	4.9	0.4
Prophylaxis	14,363	222.9	18.6

*Includes fillings, crowns, root canals, inlay recemented and crown recemented.

The number of Dental Officers reporting the above Dental Service for the month of April was 820 with the ratio of total Dental Officers to the total strength being 1.2 per 1000 men, or one dentist for every 860.9 men.

The admission rate for Stomatitis, Vincent's, during April was 12.2 per 1000 per annum or 1.0 per 1000 for the month, an increase from preceding month.

For every tooth extracted, 1.3 were replaced by dentures or bridges, indicating that 30% more teeth were replaced than extracted. The average number of teeth replaced by each partial denture constructed was 5.7. During the month 566 defective bridges were repaired or recemented. For each tooth extracted there were 4.8 permanent restorations, (fillings, etc) inserted. The average number of permanent restorations per reporting Dental Officer was 111.9. The average number of teeth extracted per reporting officer was 23.2. For the amalgam restorations, 34.3% were Oxyphosphate and amalgam. Of the Silicate restorations, 4.6% were Oxyphosphate and Silicate.

All the above ratings were computed on the basis of the Mean Strength of April 1945.

As of: 30 April 1945.
